REMARKS

The figures of births and deaths shown in this statement or the week ending the 11th June, 1949 relate to 158 towns with an estimated population of 18,553 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 74% of the total number of towns representing 72% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 10,461 and 6,612 representing birth and death rates of 9.3 and 18.6 per thousand of the population respectively.

(A) *India*:—The data here relate to 138 towns with an estimated population of 16,364 thousands. The total number of towns is 189 and their population is 23,320 thousands. Thus 73% of the total number of towns representing 70% of the population is covered. The number of births and deaths recorded in these towns were 9,449 and 6,125 repre-

sented birth and death rates of 30.0 and 19.5 per thousand of the population respectively. The table at the end gives the position by provinces :—

No town recorded a high death rate of 50 or over per thousand of the population.

(B) *Unions and States*:—The data here relate to 20 towns with an estimated population of 2,189 thousands. The total number of towns is 24 and the population is 2,623 thousands. Thus 83% of the total number of towns representing 83% of the total population is covered. The number of births and deaths recorded in these towns were 1,012 and 487 representing birth and death rates of 24.0 and 11.6 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population.

Explanation of Symbol used :—B.=Births ; B.R.=Birth rate ; C.=Cholera ; S.=Smallpox ; P.=Plague ; F.=Fever ; D.D.=Dysentery & Diarrhoea ; R.D.=Respiratory diseases ; D.R.=Death rate.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 18th June 1949 relate to 179 towns with an estimated population of 23,079 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 84% of the total number of towns representing 89% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 12,336 and 8,113 representing birth and death rates of 27·8 and 18·3 per thousand of population respectively.

(A) *Provinces.*—The data here relate to 160 towns with an estimated population of 21,045 thousands. The total number of towns is 189 and their population is 23,320 thousands. Thus 85% of the total number of towns representing 90% of the total population is covered. The number of births and deaths recorded in these towns were 11,149 and 7,596

representing birth and death rates of 27·5 and 18·8 per thousand of population respectively. The table at the end gives the position by provinces.

No town recorded a high death rate of 50 or over per thousand of the population.

(B) *Unions and States.*—The data here relate to 19 towns with an estimated population of 2,034 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 79% of the total number of towns representing 77% of the total population is covered. The number of births and deaths were 1,187 and 517 representing birth and death rates of 30·3 and 13·2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of the population.
